DETAILED ACTION

Allowable Subject Matter

Claims 1-46 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art does not teach a method of determining a profile of a user based on statistical data and psycho-demographic information about a user comprising the steps of storing statistical data and psycho-demographic information that is based on probability-based character traits about a plurality of contents, collecting data about a user selections of a portion of the plurality of contents, integrating the collected user selections data with the stored statistical data and the psycho-demographic information about the user selections of a portion of the plurality of contents and inferring the profile of the user from the integrated information.

Williams et al discloses a method for automatically configuring a system based on a user's monitored system interaction to update a user profile. In one embodiment, system controller 104 calculates a user metric for the information in the behavior log and the current system settings as well for each of the known users. If there is a greater than a predetermined probability that the information in the behavior log matches the user profile of one of the known users, then the system controller configures the system in accordance with the user preference information of the user

profile database. Williams fails to disclose storing statistical data and psycho-demographic information that is probability based on character traits about a plurality of contents. Williams also fails to disclose iteratively integrating the collected user selections data with the stored statistical data and the psycho-demographic information about the user selections of a portion of the plurality of contents.

Herz et al (5,758,257) discloses a system for configuring user profiles based on statistics and character traits. Herz fails to disclose storing statistical data and psycho-demographic information that is based on probability-based character traits about a plurality of contents and collecting data about user selections of a portion of the plurality of contents. Herz further fails to disclose iteratively integrating the collected user selections data with the stored statistical data and the psycho-demographic information about the user selections of a portion of the plurality of contents.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
